

# Averett University Flight Lab Fees

Effective FALL 2023

The flight fees listed below are the cost that each student will incur to complete the course. These lab fees are in addition to all other University costs and fees. Flight lab fees are billed with tuition and other fees in the semester for which the course is registered.

Each flight course requires separate lab fees to cover the hourly rates for aircraft, AATD, flight instruction, FAA Knowledge exams, and one FAA practical flight tests exam. If students elect to take additional training outside of the course requirements then those fees will be in addition to the lab fee and charged directly to the student.
